A Game For Entertainment

- EXPERIENCE -

- Student Web Developer -

I have worked in a team that consists of a total of 6 students from different courses that involved applying our skills in a real-world project scenario. Weekly SCRUM meetings were in place to show development of the project. I had the role of frontend development along with another peer so tasks could be evenly distributed among us. My tasks consisted of the main page itself while assisting in some of the backend server which we used MySQL for the database.
